Dear member of the Arizona Corporation Commission,

AZ CORP COMMISSION
DOCKET CONTROL

As an APS customer and a small business owner, I believe it is very important that you enforce and embolden the energy efficiency standard for Arizona.

While energy efficiency helps ratepayers save money at home, it helps businesses and city, state and federal governments save on a much bigger scale.

Energy efficiency is the smartest move you can make as policy makers to improve the lives of ratepayers. Overall, energy efficiency is saving the American government, its citizens and businesses more than \$500 billion a year in avoided energy costs. In addition to saving money, energy efficiency projects, like building improvements and infrastructure repairs, create jobs. In 2010 alone, energy efficiency accounted for more than 830,000 jobs nationwide.

As people concerned about the economy of Arizona and the well-being of the ratepayers, I trust you'll enact policies that save money and create jobs. That's why it's important that you fully embrace energy efficiency.

Thank you,

Arizona Corporation Commission
